Career Objective

I am pursuing an MSc. in Economics with a focus on data-driven analysis. I am a self-motivated, goal-oriented and detail-oriented student, keen to apply my analytical abilities to solve real-world problems and contribute to data-driven decision-making.

Certificates

- Social Media Data Analytics – University of Washington
 - Applied Text Mining in Python – University of Michigan
 - Generative AI Fundamentals Specialization – IBM
-

Education

M.Sc. Economics (Data Analytics) expected 2027

Symbiosis School of Economics, Pune

Concentration in Econometrics, Data Mining, Data Visualisation, CGPA: 7.5

BSc. in Economics (Hons) 2025

University of Calcutta, Kolkata

Concentration in Statistics, Economics & Mathematics; graduated with 7.457 G.P.A.

Academic Projects

Global Socioeconomic Development Dashboard | Power BI, Power Query

- Built an interactive Power BI dashboard using World Bank data for data visualization and comparative socioeconomic analysis.
- Performed data cleaning and data manipulation in Power Query to create KPI cards, maps, and interactive dashboards supporting data-driven decision-making.

Online Retail Sales Analysis using SQL

- Designed and queried a relational retail sales database using SQL (JOIN, GROUP BY, CASE, Subqueries).
- Performed data extraction, data manipulation, and sales analysis to identify customer trends, top products, and monthly business insights.

Consumer & Market Demand Analysis — Airline Pricing (USA) | R, Econometrics

- Analysed the impact of fuel prices and passenger demand on airline fares using time-series regression, applying ADF, t-test, F-test and normality tests to evaluate model validity
- Addressed autocorrelation and heteroskedasticity using Newey-West corrections, generating reliable insights into pricing sensitivity and revenue management.

Macroeconomic Trend Analysis — Inflation & GDP across 50 Countries

- Analysed a 10,000+ observation World Bank dataset using Python and Stata to examine inflation and GDP across 50 countries.
 - Applied econometric techniques to generate business insights and support macroeconomic forecasting and data-driven decision-making.
-

Other Skills

- Technical: R, Python, SQL, Power Bi, Advanced Excel, Stata
 - Languages known: English, Hindi, Bengali
 - Professional: Communication, Team Collaboration, Analytical & Logical Problem Solving.
-

Extra-Curricular Activities & Achievements

- Placement cell member, Symbiosis School of Economics 2025-2026
- Created and managed an art business on Instagram
- Passionate musician and synthesizer player
